Présentation COLT et de son positionnement

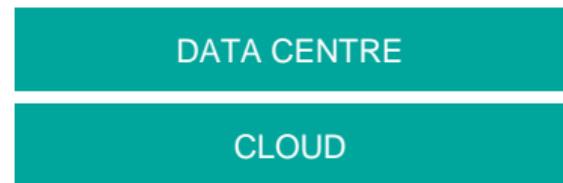

Colt accompagne votre transformation digitale grâce à des solutions très haut débit, agiles et disponibles à la demande

Les besoins en connectivité progressent pour faire face à des exigences en évolution constante

Interconnexion des filiales/autres sites

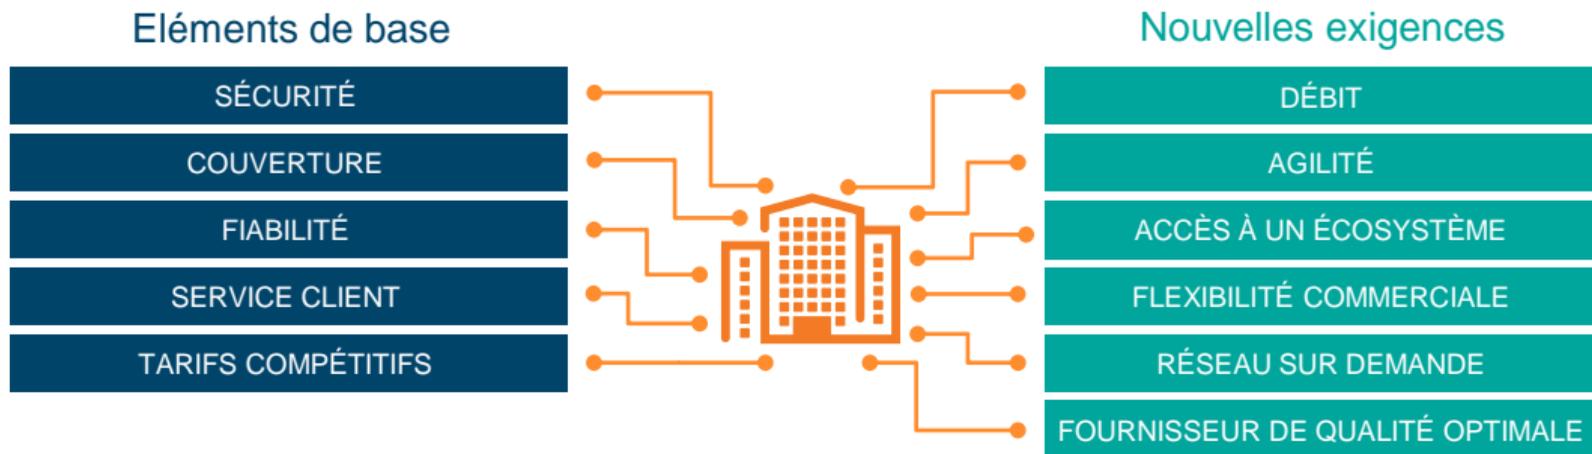

Votre écosystème numérique

Informatique d'entreprise –
Dominée par les services IP

Informatique d'infrastructure -
dominée par les services Ethernet
et la fibre optique

De nouveaux éléments de connectivité doivent être réunis pour que les entreprises restent compétitives

Colt répond à toutes ces exigences : c'est le nouveau standard

Nous investissons là où il faut...

1

INVESTIR DANS LES HOMMES

Deux fois plus de fonctions en contact direct avec les clients en 2020

2

OBJECTIF HAUT DÉBIT

Mettre l'accent sur la connectivité à haut débit

3

AMÉLIORER NOTRE RÉSEAU

D'importants investissements et modernisations seront apportés au réseau pour connecter de nouveaux marchés, des data centres clés et des points d'accès au Cloud

4

PRIORITÉ AU CLIENT

Améliorer en permanence l'expérience de nos clients. Évaluation record à l'indice NPS de mesure de la relation client.
Nous visons toujours plus haut !

5

AMÉLIORATION DE LA PRODUCTIVITÉ

Investissements intelligents dans des systèmes de back-end en vue d'améliorer l'efficacité et de réduire les délais de réalisation

6

CULTURE DE CHALLENGER

Remettre en question le statu quo industriel – et notre propre entreprise – pour favoriser l'innovation

= 500 millions d'euros d'investissements sur 3 ans

Répondre à vos exigences...

colt

...avec une connectivité
sécurisée et intelligente
pleinement maîtrisée —
où et quand vous en
avez besoin.

2

La transformation de l'informatique dans l'entreprise modifie la façon dont les sociétés « consomment » la connectivité

MAÎTRISE TOTALE DE
VOTRE RÉSEAU

FLEXIBILITÉ DES
EXIGENCES EN
TEMPS RÉEL

CONTOURNER LES
MODES DE
PRESTATION DE
SERVICES
HISTORIQUES

MODULER LA
CONNECTIVITÉ ET LE
DÉBIT À LA HAUSSE
OU À LA BAISSÉ

TARIFICATION ET
FACTURATION
DYNAMIQUES

Réseau Colt IQ

Our network

Connected buildings

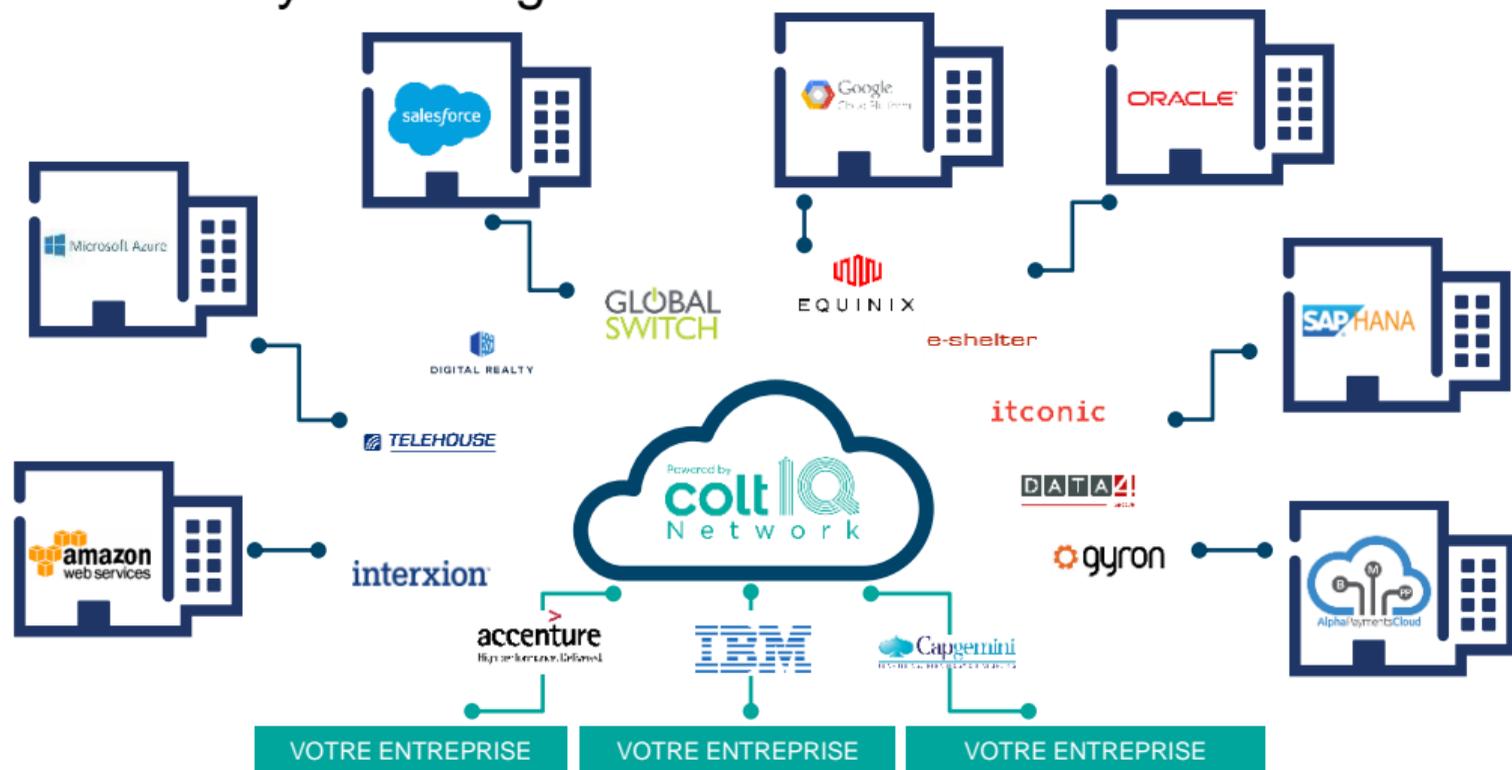

Our network

Colt is connected to more data centres than any other operator

Intégré au Cloud, le réseau Colt IQ est le cœur intelligent de votre écosystème digital

Notre réseau

Le réseau Colt couvre 28 pays sur
3 continents

Il connecte 49 zones
métropolitaines et plus de 200
agglomérations

C'est 187 579 km de fibre optique à
travers le monde

Nos points forts pour les acteurs de l'audiovisuel et du multimedia

- Large amount of DATA → High Bandwidth
- Real Time traffic → Low Latency
- Critical DATA → Resiliency and infrastructure protection
- Sensitive DATA → Encryption and Security
- Complex & distributed DATA processing → Distributed architectures and multihoming

High speed, low latency and high bandwidth Services

- Wave, Ethernet and Dedicated Cloud Access

We can now scale to (very) high bandwidths

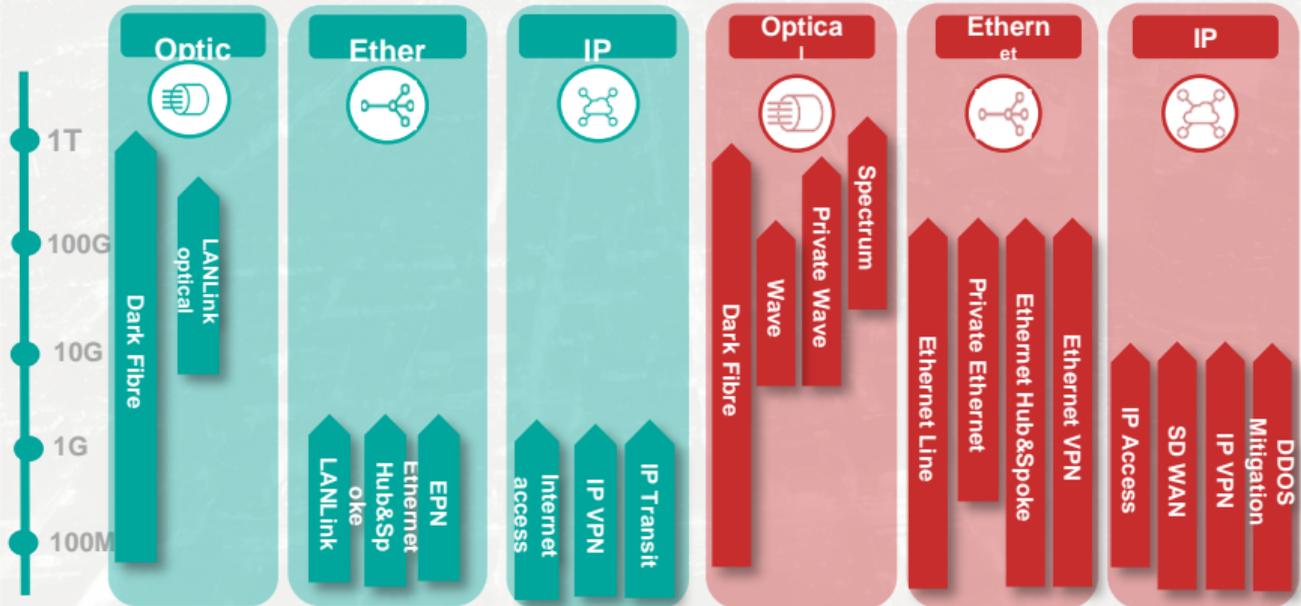

Existing portfolio

- Mainly sub 1Gbps services
- Some 10/100Gbps services, many platform limitations

New portfolio

- Up to 100Gbps for optical & Ethernet services, 10Gbps for IP
- Industrialised delivery across scalable platforms

A new portfolio

Our new Wave and Ethernet services compared

colt

colt

Ethernet Line *P-P Ethernet service*

- Based on MPLS (packet) platform
- Range of BW's 10Mbps to 100Gbps
- Resilient core, unprotected/protected metro
- Enterprise connectivity, carrier access

Vs

Wave *P-P wavelength service*

- Optical (WDM) network
- Discrete bandwidths - 10Gbps & 100Gbps
- Unprotected by default, 1+1 diversity options
- Backbone, submarine backhaul

Private Ethernet *Dedicated NTE/fibre*

- Ethernet interfaces
- Dedicated fibre & NTE, single services
- Metro only, maximum security
- Lowest latency, customer defined routes

Vs

Private Wave *Private WDM network*

- Range of protocols
- Private WDM network, multiple services
- Metro only, maximum security
- Customer defined routes

Dedicated cloud access – what is it?

colt

We DO connect customers to the major public cloud providers

We DON'T resell cloud services!

Colt On Demand

colt

Colt's Cybersecurity services monitor, detect and protect your data and IT infrastructure from cyber threats and security incidents and help you manage your risk.

Firewall

Safeguard your internal networks and systems from Cyber threats

- **Managed Dedicated Firewall** soon

Our Next Generation Firewall service on a dedicated infrastructure is fully managed by Colt's cybersecurity experts to keep your network safe, so you can stay focused on growing your business.

- **Managed Virtual Firewall**

Cost-effective firewall delivering the benefits of virtualization through fast provisioning, unlimited scalability and eliminating your need to maintain a physical network firewall.

Available
Technology refresh in
Q3: Virtualization

DDoS Protection

Protect your internet based application and services from Distributed Denial of services (DDoS) using Colt's IP Guardian service. Available

Network Encryption

Secure your in-flight data by Colt's network encryption services soon

- **Optical Encryption** soon

Robust in-flight optical encryption.

- **Ethernet Encryption** soon

Protect your data on carrier Ethernet encryption Available

- **IP Encryption** le

Secure IP data transmission

- **Voice Encryption**

Secure VoIP by SIP traffic and VoIP Audio encryption

Proposed architectures

Paris Voltaire (TH2)

InterTV Barcelona

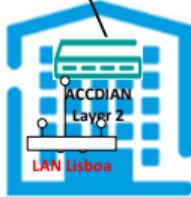

-10G to be planned-

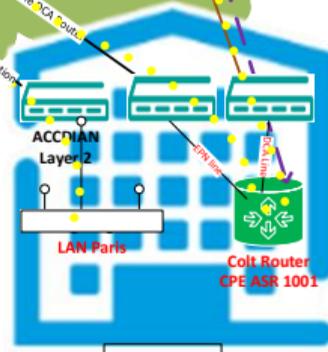

Colt Ethernet Backbone

DC Madrid

DC Lisboa

DC Paris

-10G Ethernet for inter-sites communications-

-10G Ethernet Only for the DC1 route-

Outbound Cloud Access

BGP peering

Colt Router
CPE ASR 1001
